JAN 1988 - PRESENT

RESUME

I'm an allround developer looking for a role in an inspiring team. I enjoy creating pleasurable user experiences for everyone, but I don't mind fiddling around in the back-end either.

I am looking for a place to keep sharpening my existing skills.

Take a look at [my website](#) (dutch) for a quick look at what I did and what I can do.

EXPERIENCE

Full stack developer at Your Next Concepts

SEPT 2018 - SEPT 2020

Programming and business development in a small company. We made web apps for educational services in the Benelux.

Java Software Engineer at Keylane

SEPT 2016 - SEPT 2018

Converting databases of insurance companies into our system. I took the responsibility of training the new guys on our team, and weekend standby calls. Gave the internal course of database modeling.

EDUCATION

Game and Media Technology at Utrecht University

2010 - 2016

Finished my Masters by building a memory improving game in corporation with Utrecht Medical Centre

PROJECTS

Freelance web developer at On the Move

On the Move is a foundation aimed at helping young kids to play sports. I did their website redesign and news letter as their main IT guy. Besides that I also gave football and disc golf courses.

Frontend projects at frontendmentor.io

Created several projects from design to website. I sharpened up my HTML, CSS and Javascript knowledge with some fun projects. Check out [my account here](#).

Goal Alert app

I created a fun Progressive Web App, that consumes an API and sends notifications. Built using a NodeJs server and a VueJs frontend.

OTHER (LINKS)

I once ran from Amsterdam to Utrecht
I organised an online sports quiz during lockdown
I am the chairman of a futsal club

HIP WORDS I'VE WORKED WITH

HTML · CSS · SCSS · JavaScript · VueJs · Java
Git · SVN · NPM · NodeJs · Jira · Scrum
Visual Studio Code · IntelliJ · Figma
